# AWS VPC Peering Project

Submitted By: Katiki Dinesh Sai
Region: ap-south-1

## Project Overview

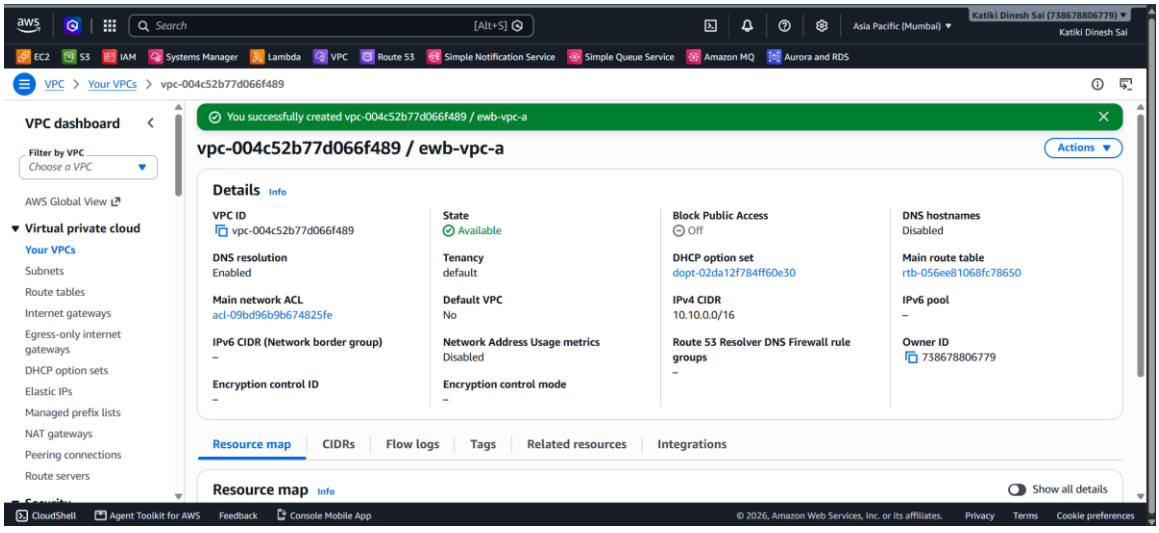

This project demonstrates secure communication between two Amazon VPCs using VPC Peering. It includes VPCs, subnets, Internet Gateway, route tables, security groups, EC2 instances, VPC peering, and connectivity testing.

## Connectivity Summary

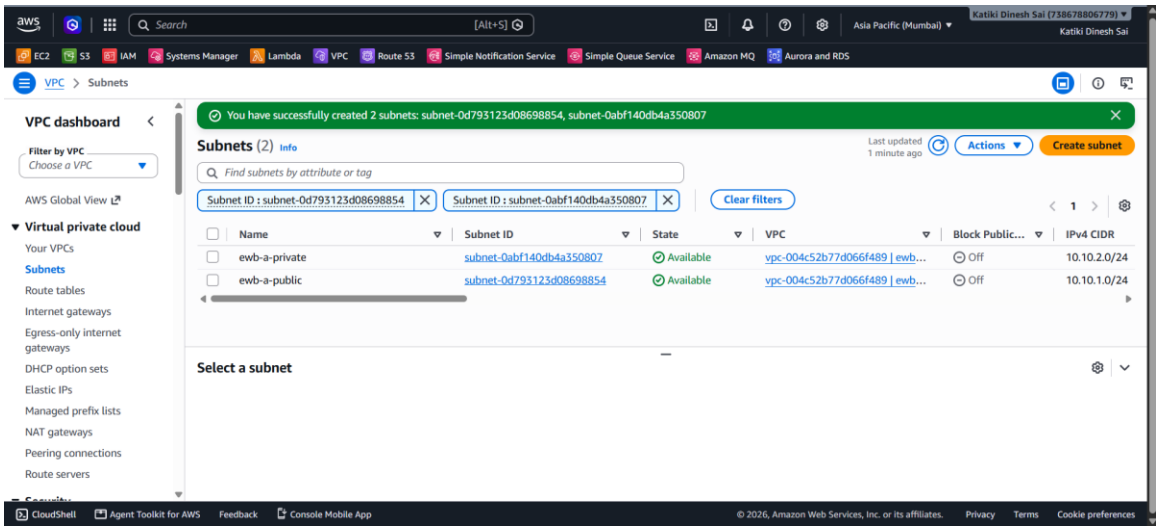

- Baseline ping failed before peering
- VPC peering became Active
- Forward ping App-A to App-B succeeded
- SSH from Bastion to App-B succeeded
- Reverse ping App-B to App-A succeeded
- Controlled ICMP failure demonstrated
- ICMP recovery verified
